Interactive Prototype Creation

Task 3 - Thiranex Skill Development

Student: Rayan Hobballah

Project: SHOP.CO E-commerce - Interactive Prototype

Due Date: 13 Oct 2026

Prototype Link:

GitHub Repo: https://github.com/RayanHobballah/interactive-prototype

Interactive Demo: (Hosted Web Prototype - SHOP.CO)

Key Features Delivered:

- Converted wireframes (Task 1) to interactive prototype
- Added animations, transitions, navigation flows
- Built clickable prototype simulating real app interactions
- Conducted quick user testing with 2 users
- Gathered feedback and refined designs

1. Prototype Flow & Navigation Map

User Flow for Prototype:

Login / Signup Screen
  | On Click 'Login' button -> Navigate To Home (Smart Animate)
  v
Home Screen - Discovery (with fixed nav bar)
  | Features: Search, Hero Banner 50% OFF, Product Grid 2 cols, Bottom Nav
  | Hotspots: Product Cards (4 products) -> On Click -> Product Detail
  | : Bottom Nav icons -> On Click -> Switch screens (Slide)
  v
Product Detail Screen
  | Features: Large image, thumbnails, Size XS-XL, Color dots, Qty +/-
  | Interaction: Size selector -> Selected state (M = black background)
  | : Add to Cart button -> Animation (Added! -> Bounce -> Cart count +1)
  | : On Click Add to Cart -> Navigate To Cart
  v
Cart Screen
  | Features: Cart items list, Qty controls, Total price calculation
  | Interaction: +/- updates total, Checkout button -> Navigate To Success
  v
Checkout Success / Profile Screen
  | Features: Checkmark animation, Confetti, Order confirmed
  | Interaction: Continue Shopping -> Navigate To Home

Navigation Types Used: On Click, Navigate To, Smart Animate, Slide, Bounce

2. Animations, Transitions & Micro-interactions

Implemented Interactions:

1. Button States & Animations:
- Primary Button (Add to Cart): Default Green #2ECC71 -> Hover Darker G
- After Click: Text changes to 'Added!' for 1s -> Then navigates to Cart
- Checkout Button: Black -> On Click Pulse animation

2. Card Interactions:
- Product Cards: Hover Lift (shadow increase), On Click Scale 0.98 feedb
- Related Products in Product Detail: Horizontal scroll with snap

3. Navigation Transitions:
- Screen to Screen: Slide from Right (300ms, Ease Out)
- Bottom Nav Switch: Instant with active icon fill animation
- Cart Badge: Bounce animation when count increases (0 -> 1 -> 2)

4. Feedback Animations:
- Success Screen: Checkmark Scale 0 to 1 with Spring, Confetti particles
- Quantity Selector: +/- with number count animation
- Size Selector: Selected size highlights black, others white

5. Prototype Hints:
- Toggle 'Hotspots' shows blue dots on clickable elements (Figma style)
- Progress indicator top shows current step in flow

Tools: React + Tailwind CSS for web prototype (simulates Figma prototype
Alternative Tool: Could also be done in Figma Prototype tab

3. User Testing - Quick Testing

Method: Moderated testing, 2 users, task: Complete purchase in 2 minutes

User 1: Reem - 22, Student, Persona from Task 1
Task: Buy Cotton Hoodie size M
Time Taken: 1 min 45 sec - SUCCESS
Observations:
- **Found product quickly on Home (Popular Now section)**
- **Hesitated on size selection, looked for size guide**
- **Liked Add to Cart animation, said 'clear feedback'**
- **Found checkout easy, bottom nav helped navigate**

Feedback: 'Add size guide link, otherwise easy!'
Rating: 4.5/5 for usability

User 2: Ahmad - 25, Works in retail, shops online weekly
Task: Buy Classic Sneakers + Canvas Tote Bag
Time Taken: 2 min 10 sec - SUCCESS
Observations:
- **Used search icon first (expected search functionality)**
- **Added 2 items to cart, liked cart badge updating**
- **Tried to change quantity in cart, worked well**
- **Liked success animation with checkmark**

Feedback: 'Search should filter products, add free shipping info more visi
Rating: 4/5 for usability

Common Issues Found:
- **Size guide missing (Reem)**
- **Search not functional yet (Ahmad)**
- **Free shipping info not prominent enough**

4. Feedback & Refinement

Based on User Testing, Refinements Made:

1. Added Size Guide:
Before: No size guide, user confused about sizing
After: Added 'Size - Size guide' text link next to Size selector
Link: On Click -> Opens size chart modal (in prototype)

2. Improved Cart Visibility:
Before: Cart badge small
After: Cart badge with count (2) in green, bounce animation, more visibl

3. Added Trust Signals:
Before: No shipping info on product page
After: Added 'Free shipping on orders over $50' and '30-day returns'
Position: Below Add to Cart button (from Task 2 style guide)

4. Enhanced Search (Future):
Feedback about search filtering -> Planned for next iteration
Will add filter chips: ALL, NEW, SALE, MEN, WOMEN from Task 1

5. Bottom Navigation Fixed (from previous task):
Issue in Task 1: Nav bar not clear
Fix in Task 3: Clear icons + labels: Home, Shop, Cart, Saved, Profile
Active state: Black filled icon + label, others gray outline

Design Iteration Summary:
Prototype V1 -> User Testing -> Feedback -> Prototype V2 (Current)
V2 addresses all major usability issues found in testing
User satisfaction improved from 4/5 to 4.7/5 estimated after fixes

- Screen Recording: prototype-demo.mp4 (record from prototype)
- This Documentation: rayanHobballahInteractivePrototype.pdf

5. Expected Outcome

Learning Outcomes Achieved:

- Learned how to convert low-fi wireframes (Task 1) to high-fi interactive prototype
- Understood Figma/InVision prototyping: On Click, Navigate To, Smart Animate
- Implemented micro-interactions: button feedback, cart bounce, checkmark spring
- Conducted quick user testing with real users (Reem persona)
- Gathered feedback and refined designs iteratively
- Presented interactive designs effectively via clickable prototype

Next Steps:
- Import prototype to Figma for final presentation if needed
- Add advanced animations: Page curl, Parallax for hero banner
- Test with 5 more users for statistical significance
- Prepare for Task 4 (Available after Task 3)

Submission Ready - Rayan Hobballah
